Experience

03/2026	Python Full Stack Developer
Kochi	<i>Inmakes Infotech</i>
	Build responsive and interactive web pages using HTML, CSS, and Bootstrap. Started with small Django-based projects to implement key features such as authentication, CRUD operations, and API integrations.

Projects

- DietLens: (Work in progress) A Django-based web app to calculate BMI, BMR based on user input. Integrated Twilio API to send health insights through WhatsApp and Google Gemini AI for food image-based calorie estimation. Implemented secure login with email notifications using Django signals and enabled premium features through Razorpay.
- To-Do List: A user-authenticated To-Do List web application using Django with task creation, editing, deleting and responsive UI.
- Expense Tracker: Django app to create, update, delete the expense of the users.
- Valora: An Ecommerce application for jewellery with features like product browsing, wishlist management, cart functionality and order tracking.
- Golden Bites: An Ecommerce application for foods with features like online ordering, add to cart and order tracking.
- Connect Hub: A social media platform that allows users to create and update personal profiles, share posts and stories, and interact through messaging and groups. It also includes search functionality for easy content discovery.
